

## Measuring Guide Roman Blinds

Measuring for your new Roman blinds is easier than you might think! All you have to do is follow our simple tips, double-check everything you do, and set aside some time to do it. Happy measuring!

First decide where you want the blind to hang, this can be either inside the recess or outside of the recess. Now check there are no obstructions inside or outside the window recess where the blind will hang, for example look out for handles, part tiling, or windows that open inwards. If you need advice, call us or even send us a photo.

## **Inside Recess Measurement**

Make sure the recess is at least 7.5cm deep, otherwise it will not be able to accommodate the operating mechanism.

Step 1: Measure the width of your recess at three locations. The top, middle and bottom. Record the smallest measurement.

Step 2: Measure the drop of your recess at three locations. The left, middle and right. Record the smallest measurement.

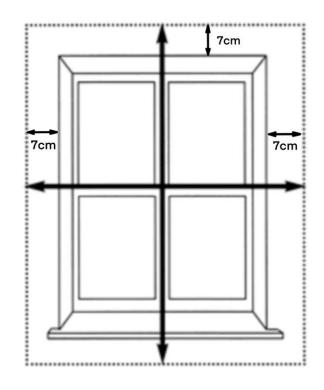

Please note we will subtract 1cm to your width dimension to provide clearance.

## **Outside Recess Measurement**

Decide how far you want the fabric to overlap the wall.

Step 1: Measure the outside of your window recess from one side to another from the point you want. We recommend that overlap should be at least 7cm from each side, in order to minimise as much of external light as possible.

Step 2: Measure the outside of your window recess from the top to the bottom, from the height at which you want the cassette system to sit. It should be positioned at least 7cm above the window, down to the point you want the bottom bar to stop.

## Warning

Young children can be strangled by the loops in pull cords, chains, tapes and inner cords that operate this product. To avoid strangulation and entanglement, keep cords and chains out of reach of young children. Cords may become wrapped around a child's neck. Move cots and furniture away from window covering cords. Do not tie cords together. Make sure cords do not twist and create a loop.

Need help?

If you are still unsure about the measurements please contact us, and we will be happy to help. info@design-jr.com
